

Blueprint® Co-Product Mineral is a loose mineral for beef cattle being fed rations containing ethanol co-products.

ABOUT THE PRODUCT

- If cows are fed a total mixed ration with high levels of corn co-products (e.g., distillers grains or gluten feed), this mineral will properly balance the macromineral profile of rations
- When grass greens up and products containing co-products are no longer being fed, this product may be fed during grazing
- Designed to provide optimal digestion and nutrient absorption
- Unlocks efficiency and animal performance
- Readily available organic trace minerals maximize immune health and performance

NUTRIENT ANALYSIS

Calcium, min	19.5%
Calcium, max	23.4%
Salt, min	19.0%
Salt, max	22.8%
Magnesium, min	4.5%
Copper, min	660 PPM
Selenium, min	26.4 PPM
Zinc, min	1,938 PPM
Vitamin A, min	300,000 IU/LB
Vitamin D, min	30,000 IU/LB
Vitamin E, min	1,000 IU/LB

FEEDING DIRECTIONS

Feed Blueprint® Co-Product Mineral free choice to cows and heifers in mineral boxes or feeders. Start feeding approximately 30 days before calving until 30 days after calving. Cows should consume approximately 4 ounces per head per day. For best results place a 2 week supply of mineral in the feeder. Check often and replenish as necessary. Do not provide additional salt. Provide a constant supply of clean, fresh water.

CAUTION

This product, which contains added copper, should not be fed to sheep or related species that have a low tolerance to copper. This product has been formulated specifically for beef cattle and is not intended for other species.

Follow label directions. Adding higher-than-recommended levels of this supplement to feed containing added selenium is not advisable.

Hubbard Feeds does not use restricted-use proteins in products and follows both FDA and state requirements regarding the use, handling and storage of restricted-use proteins
