Vitamin E, min	400 IU/LB

FEEDING DIRECTIONS

Blueprint® Cow Calf High Mag is formulated to be fed at 4 ounces per head per day. It is important that animals consume adequate amounts of Blueprint Cow Calf High Mag. It is recommended that Blueprint Cow Calf High Mag is mixed with grain and force fed to ensure adequate intake.

If force feeding is not possible Blueprint Cow Calf High Mag may be offered on a free choice basis. Start feeding Blueprint Cow Calf High Mag thirty days prior to the cattle being grazed on lush grass. Do not feed additional salt or other mineral sources. Blueprint Cow Calf High Mag intakes will vary. Intakes of Blueprint Cow Calf High Mag should be estimated biweekly. If free choice intakes are less than 4 ounces per head per day Blueprint Cow Calf High Mag should be force fed.

Provide fresh clean water at all times.

Supplemental mineral requirements of cattle vary by region, forage quality and season. Individual animal requirements may vary due to age, size, stage or growth or milk production. Please consult your Hubbard Feeds representative if you have questions about mineral supplementation.

CAUTION

This product, which contains added copper, should not be fed to sheep or related species that have a low tolerance to copper. This product has been formulated specifically for beef cattle and is not intended for other species.

Follow label directions. Adding higher-than-recommended levels of this supplement to feed containing added selenium is not advisable.

Hubbard Feeds does not use restricted-use proteins in products and follows both FDA and state requirements regarding the use, handling and storage of restricted-use proteins.
