

Blueprint® Fescue FEB-200™ is a loose mineral for beef cattle on pasture consuming fescue forages.

ABOUT THE PRODUCT

- Contains FEB-200™, a yeast cell wall derivative
- Research shows that when beef cows were fed a yeast cell wall derivative in combination with fescue straw containing high levels of ergovaline, prolactin levels and milk production returned to normal
- May be fed year-round as a free-choice mineral
- Designed to provide optimal digestion and nutrient absorption
- Unlocks efficiency and animal performance
- Readily available organic trace minerals maximize immune health and performance

NUTRIENT ANALYSIS

Calcium, min	13.0%
Calcium, max	15.6%
Phosphorus, min	5.0%
Salt, min	19.0%
Salt, max	22.8%
Potassium, min	2.0%
Magnesium, min	2.0%
Copper, min	660 PPM
Selenium, min	26.4 PPM
Zinc, min	1,938 PPM
Vitamin A, min	300,000 IU/LB
Vitamin D, min	30,000 IU/LB
Vitamin E, min	500 IU/LB

FEEDING DIRECTIONS

Blueprint® Fescue is formulated to be fed to cattle grazing fescue pasture at approximately 4.0 ounces per head per day. If Blueprint® Fescue is offered free-choice, introduce it gradually over a 14 day period. Offer 4.0 ounces per head per day during the period to avoid over consumption.

Blueprint® Fescue intakes will vary. Estimate mineral consumption rates on a monthly basis. If intakes are greater than 4.0 ounces per head per day, offer more salt either free-choice or mixed with the mineral. If intakes are less than 4.0 ounces per head per day, decrease the amount of salt offered.

Provide fresh, clean water at all times.

Supplemental mineral requirements of cattle vary by region, forage quality and season. Individual animal requirements may vary due to age, size, stage or growth or milk production. Please consult your Hubbard Feeds representative if you have questions about mineral supplementation.

CAUTION

This product, which contains added copper, should not be fed to sheep or related species that have a low tolerance to copper. This product has been formulated specifically for beef cattle and is not intended for other species.

Follow label directions. Adding higher-than-recommended levels of this supplement to feed containing added selenium is not advisable.

Hubbard Feeds does not use restricted-use proteins in products and follows both FDA and state requirements regarding the use, handling and storage of restricted-use proteins.
